LETTER

In parent application 09/218,989, Applicants successfully petitioned under 37 CFR 1.48(a) to correct the original naming of inventor(s), in which inventor Dennis J. Rehmer had been omitted. However, in filing the subject divisional application, Applicants inadvertently submitted a copy of the original executed declaration from the parent case rather than the executed declaration from parent application naming the correct inventive entity.

Enclosed is a copy of the executed declaration from parent application 09/218,989 naming the correct inventive entity for the subject application. Also enclosed are copies of the petition under Rule 1.48(a) from parent application 09/218,989, the accompanying papers, and the decision thereon.

Applicants request issuance of a corrected Filing Receipt reflecting the correct inventive entity in the subject application.

Respectfully submitted,

STATEMENT OF FACTS

Subsequent to the filing of Application No. 09/218,989, entitled "Traction Enhanced Controlled Pressure Flexible Flat Tension Member Termination Device," filed on December 22, 1998, a review was conducted of applications and invention disclosures relating to termination devices and the like, it was determined that the undersigned, Dennis J. Rehmer, contributed to the invention claimed in the subject application.

The omission of the undersigned as a named inventor was without deceptive intent. The omission apparently resulted from the submission of multiple invention disclosures, some of which did not identify the undersigned as an inventor, relating to termination devices.
